Importing and Exporting Photoshop Actions

Actions are a way of automating tasks that you perform repetitively. They greatly simplify your workflow. You can also find numerous actions that others have created on the web which you can download for free.

Importing an Action

When you get action files from others, they normally have a file extension of *.atn*. They are actually an action set and may contain one or more actions.

Open Photoshop.

Select the Actions palette.

-	▶ 🛄 Doug File Handling 2	1
-	▶ 🛄 Flawless Portrait	1
-	▶ 🗎 glamblur	
	▶ IIII Hasselblad Softar 2 Effect	۲

Press the Actions palette menu button.

Select Load actions...

Navigate to the *.atn file.

Select the atn file.

Press the Load button.

The new action set will be loaded at the end of the list of actions.

Exporting Actions

Actions can be distributed to others or moved from one computer to another.

Select the **Actions** palette.

4		Default Actions	Ā
	-	my actions	'n
1		Callant	
7		h dreamscane	
	F	Laver 9 (sets opacity)	
	-	Beverse Montage Opacity	
7	E.	Reverse Montage Multiply	
1		▶ dreamscape cs2

By default Photoshop will save the action as the action set name. You can accept that name or create a new name.

Save As	: Gallant		
< ►) (# =	freeman_class	¢ Q search	
DEVICES Cyclops cyclops 200 \triangleq PLACES Desktop Applicati mgs Documents	 1-matthew-mon.jpg 1-matthew-tue.jpg 1-matthew_friday.jpg 1-matthew_wed.jpg 2-matthew-mon.jpg 2-matthew-tue.jpg 2-matthew_triday.jpg 2-matthew_wed.jpg 3-matthew-mon.jpg 3-matthew-tue.jpg 		

Press the **Save** button.

The action set will be saved in the location that you specified, in this case as *Gallant.atn*.
